

## A SINGLE SOURCE OF TRUTH FOR ALL YOUR ASSETS

Telescope offers brands and organizations a way to quickly store, sort and share assets and content for improved efficiency, productivity, brand consistency, and overall ROI.

The smartest and fastest enterprise digital asset management (DAM) technology, Telescope provides organizations and enterprises with a highly customizable, feature-rich, scalable single source of truth for all of their digital assets. It is used by organizations around the world to manage millions of in progress and approved assets while making them readily and easily available to those that need them via the cloud.

With immediate access to organizational content with metadata driven file management, businesses utilizing Telescope see a quick lift in time/cost savings and increased asset speed to market - all while delivering a more unified and complete brand across channels and markets.

### 1-click search of your company's entire media library

Securely sort and store any type of in-progress and approved digital asset, content, media or file and share them with peers, employees, partners, resellers, franchisees, etc. via the cloud.

### Automatic lift in organizational efficiency

Use simple and advanced search functionality to help your team get to the right asset, right away. No more manual folder searches, disparate naming conventions or file recreation.

### Smart Collections, Forms, and Advanced Searches

Use multiple methods to find assets. "Smart Collections" allow you to track fresh content automatically, while "Forms" and "Advanced Searches" allow for more complex, predefined searches.

### Unmatched Metadata Capabilities

Flexible and highly customizable metadata structure grows with your organization and provides powerful, efficient search capabilities and process automation that bends to your needs, not vice versa.
