

Ignite Customer Support Programs

Services to Support Your Success

Customer success is our #1 objective, and that's why we've created the Ignite Customer Support Programs, which we offer at Standard, Gold and Platinum service levels.

Ignite's Platinum Support Program is the preferred option for our most active and demanding customers, as it contains the widest array of services and the highest prioritization for critical issue resolution. With Platinum, you'll receive industry-leading support from experts in Ignite's support, services and engineering teams to ensure you get the most out of your Ignite solutions, as well as have access to global, always-on support for your most mission-critical solutions.

Ignite Platinum

Preventive, Personal and Always On.

Exclusive Benefits

24x7, Always-On

Experience confidence knowing that Ignite technical experts are only a phone call away when you need them most. Ignite support services staff are available for you all day, every day.

Highest Priority

Receive highest-level priority on all support requests such that your issues are triaged with priority over those of non-Platinum customers. For severity one issues, enjoy less than 60-minute response from a product expert through Ignite's support portal and real-time, immediate routing of your issue via phone.

Ignite Prime & Prime Kickstart

Accelerate your use of Ignite's Prime program with Prime Kickstart Services. Ignite Prime is our program that provides access to tens of millions of dollars in enterprise software for free, for the life of your Ignite relationship. Prime Kickstart Services include an installation and configuration of a Prime-eligible solution. Refer to the Ignite Prime Solutions Catalog for a list of Prime solutions for which Kickstart services are available.

Unlimited Support Access

Leverage unlimited support ticket counts for opening as many issues and asking as many questions as you need to raise each year.

Forever Upgrades

Maintain superior performance, stability and security of your Ignite solution through immediate access to all Generally Available upgrade releases of the Standard Edition product to which you're licensed. Upgrades are available during the life of your Support contract carrying you forward for years and years without the requirement of paying new license fees for new versions.

Reduced Professional Services Fees

Enjoy a 15% discount on Professional Services contracted from the breadth of Ignite's consulting offerings: from new software implementations, integrations and customizations, to data analysis, model development, and installation assessments, and all the way to managed administration for customers who need a fully outsourced model of solution management.

Additional Platinum Services For

Acorn Solutions

Ignite’s Platinum Support Program is designed to deliver a higher value experience to include customized, professional services. That’s why, in addition to the benefits outlined in Ignite’s Platinum Support Program for all Ignite solutions, the following Acorn solution specific professional services are also included in our Platinum Support Program for Acorn customers.

SOLUTION SERVICES	STANDARD	GOLD	PLATINUM
Managed Upgrades	-	-	Annually
Test/QA Licenses	-	-	✓

Managed Upgrades

This annual service is a guided upgrade from your current version of PA5G to the most recent software version. The streamlined process has four stages.

- **Survey:** Information and specifications on your deployment are collected via customer questionnaire and through discussions with your system administrators.
- **Analysis and Preparation:** A technical analysis of the upgrade is developed, and key inputs (e.g. documents, reports, coded scripts with stored procedures, sample input time-period data, etc.) are collected and validated, followed by documentation of model design, AUC/ETL processes, DB sizing, HW sizing, and validation of PA5G calculation and cube processing.
- **Testing:** The actual upgrade is deployed on a test/UAT environment with customer-provided models. Upgrade is validated using test cases created from customer use cases and Ignite best practices.
- **Deployment:** Upon upgrade completion and validation by the UAT upgrade team, system is handed over to customer for further testing, validation and confirmation. After customer sign off, implementation is promoted to production.

Test/QA Licenses

A key platinum benefit is the inclusion of licenses for testing and quality assurance. With the Test/QA licenses, customers can ensure high quality, high stability releases with free test/QA licenses to mirror your production implementation.
