

Sococo for Enterprise

The Business Platform That Connects Your Distributed Team Online

Teams can collaborate seamlessly without friction and self-organize on the fly.

Maximize distributed team talent and creativity by hiring, connecting, and engaging the right people anywhere.

Empower employees to take advantage of the right moment to problem solve and innovate, accelerating results and inspiring ingenuity.

Scaled Agile with Ease

- Organize your Agile Release Train teams in a space divided into dedicated functional rooms
- Keep Release Train, Value Stream, and Solutions Engineers in sync with Solutions Architects, regardless of location
- Create multiple breakouts instantly after standups
- An online place for SAFe teams to work, integrate, plan and learn together

DevOps and Incident Management Magic

- Dedicated war rooms for managing production incidents
- Bring the right group together on the fly—developers, operations, management, and even customers can come together in a single location with voice, video, sharing, and chat
- Private breakout rooms make it easy to analyze issues in parallel
- Configure each room with relevant content from your web-based tools
- Keep stakeholders informed in real time, at the right pace with the right level of data

High-Performing Distributed Teams

- Dispersed teams get their work done as if they were co-located together in the same physical place
- Instant connection between people provides the foundation for trust and cohesion necessary for creating a high-performing team
- Teams naturally observe activity and see how people work as a team in an un-intrusive and friendly way - simply by occupying the space together

Premier Enterprise Customer Success Program

We work with you to ensure your company moves smoothly into their Sococo workplace and is set up for success as a distributed team. We also understand that a workforce operating from different physical locations faces unique challenges. Our Customer Success team is dedicated to helping your business flourish by creating customized programs to help you operationalize and reap the benefits of your enterprise-wide Agile transformation.

Technical Overview

Secure

Industry standard data encryption in transit and at rest

Visibility: Know who is in your meeting and who is listening

Options for Multi-tenant or Single tenant deployment

Scalable

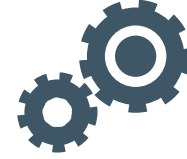

Quickly add additional spaces and provision teams

Enterprise SSO

- Authenticate Via SAML2

Web based and installable applications

- Windows
- Mac OSX
- Linux

Integration

- Slack
- Lita

Future Integrations

- Skype For Business
- Office 365
- Google Calendar
- Hipchat

SERVICE REQUIREMENTS

Firewall – For optimal performance Sococo requires outbound UDP (Ports 443, 10000 - 20000) and TCP port 443 to 65.61.148.0/24, 161.47.65.0/24, 198.162.88.0/22. If a proxy service is used access to *.sococo.com and *.sococo.net is required.

Latency – In order to maintain a high quality experience with audio and video communication, network round trip time between a Sococo client and our media servers should be < 150ms. Rounds trips of > 400ms will have a significant impact on quality.

Bandwidth Requirements

The following table provides resolution, codec, and bitrate information for individual media streams in Sococo.

Stream	Codec	Resolution	Bitrate (kbps)
Audio	Opus	–	64
Video	VP8	320 x 240	80
Screen Share***	VP8	1024 x 768	160* (1200)**

* Average screen share bandwidth based on a PowerPoint presentation

** Maximum screen share bandwidth

*** Screen Share bandwidth is widely variable based on application activity.

Uplink Bandwidth Requirements per Participant

The following table provides average and maximum uplink bandwidth requirements based on the media types that they are publishing.

Publishing	Total Bitrate (kbps)... avg. (max.)
Audio	64 kbps
Audio + Share	224 (1264) kbps
Audio, Video + Share	304 (1344) kbps
